EDUCATION

M. L. Dahanukar College of Commerce

Bachelor's, Computer Science in Information Technology

July 2022 - April 2025

GPA: 8.6

PROFESSIONAL EXPERIENCE

Muby Chem Private Limited

Web Developer

Lower Parel, Mumbai, MH, India

October 2025 - Present

- Automated the migration of 800+ chemical products by developing a Python Selenium automation system, reducing a 20–25 day manual task to just 1–2 days, increasing productivity by over 90%.
- Improved data accuracy by 95% through automated fetching, filtering, and structuring of product details (names, agencies, descriptions, images), eliminating repetitive manual errors.
- Resolved live website issues with 70% fewer recurring problems through rapid debugging and AI-assisted analysis (ChatGPT, LLM tools), ensuring stable and high-performance operations.
- Demonstrated strong problem-solving and fast-learning ability by understanding unfamiliar technologies (PHP, hosting panels, server-side tools) within 1–1.5 weeks and delivering high-quality, accurate results consistently.

Universal Support for Enterprises and Services Private Limited

Web Development Executive

Vile Parle, MH, India

July 2024 - October 2025

- Improved development efficiency by 30% by creating a reusable TailwindCSS setup and standardizing project structure, reducing setup time by 60%.
- Boosted website performance by 15% on desktop and 20% on mobile through WebP optimization and PageSpeed Insights improvements, achieving faster load times and better SEO.
- Delivered projects 30% faster by implementing efficient workflows, prioritization, and strong time-management practices.
- Customization of WordPress themes/plugins with consistent responsive behavior across devices and measurable improvements in page load stability, caching, and SEO.
- Implementation and deployment of email API services for reliable, high-performance message delivery in frontend applications.

PROJECTS & OUTSIDE EXPERIENCE

Euka AI: Your Fast Track to PM Interview Success - [Link to project](#)

Web Developer

Remote

April 2025 - Present

- Full-stack web application built with React.js + Tailwind CSS and a FastAPI backend integrated with AI via the OpenRouter API.
- Designed an intelligent system that generates 10+ personalized interview modules using company data, job descriptions, and user resumes.
- Integrated PostHog analytics for user behavior tracking and implemented sitemap.xml and blog features, contributing to ~10–15% growth in organic traffic.
- Built a complete user authentication system with Excel-based analytics and reporting, providing instant visibility of 100+ active users, waiting lists, and usage trends, reducing time spent on database checks by 25%.

Tic Tac Toe Game - [Link to project](#)

Web Developer

Vile Parle, MH, India

- Developed a fully functional, responsive Tic-Tac-Toe game using HTML, CSS, and JavaScript with complete game logic (win/draw detection and turn management).
- Enhanced gameplay with intuitive UI design and smooth game-state control for better user interaction.
- Added engaging audio effects to improve overall player experience.

To-Do List Application - [Link to project](#)

Web Developer

Vile Parle, MH, India

- Built a secure to-do system with email authentication and smooth add, edit, and delete functionality.
- Added smart date validation preventing past entries, along with clear task status updates (Pending, In Progress, Completed).
- Implemented strong input validation and error handling for a seamless user experience.
