## PROFESSIONAL SUMMARY

Full Stack Web Developer with 2+ years of experience building and maintaining scalable web applications using PHP, React, Node.js, and Python. Experienced in developing and maintaining web scrapers using Scrapy and Selenium, including debugging, automation, and handling website structure changes. Skilled in backend APIs, database management, production-level issue resolution, and scalable automation systems, with hands-on experience in AI-integrated tools and performance optimization.

## PROFESSIONAL EXPERIENCE

**Tender Impulse** **May 2026 - Present**
*Python Developer* *Kandivali East, Mumbai, MH, India*

- Developed, maintained, and optimized Python/Selenium web scrapers for automated data extraction, resolving failures and adapting to website structure changes to ensure reliable, uninterrupted daily data collection.
- Engineered proxy rotation and VPN-based IP switching to bypass rate limits and IP blocks, significantly improving scraper uptime and stability.
- Built a PHP-based monitoring dashboard that automatically tracks scraper status (running, skipped, missed tenders), cutting manual debugging effort by ~90%.
- Collaborated with cross-functional teams using Python, PHP, and MySQL to strengthen scraping infrastructure and automate operational workflows.

**Muby Chem Private Limited** **October 2025 - April 2026**
*Web Developer* *Lower Parel, Mumbai, MH, India*

- Automated migration of 800+ chemical products using Python Selenium, reducing a 20–25 day task to 1–2 days and boosting productivity by 90%+ while improving data accuracy by 95%.
- Built a centralized Document Management System (DMS) replacing Outlook-based workflows handling 100+ emails/documents, enabling product creation, document uploads, customer approvals (quotations/samples), chat, purchase orders, and enquiries—eliminating data loss risks and improving efficiency.
- Integrated secure SFTP file handling for credentials and certifications, ensuring structured and safe data exchange.
- • Managed PHP-based production systems, delivering features 40–50% faster and improving performance by 30%; reduced recurring issues by 70% using rapid debugging and AI-assisted analysis (ChatGPT, LLM tools).

**Universal Support for Enterprises and Services Private Limited** **July 2024 - October 2025**
*Web Developer* *Vile Parle, MH, India*

- Improved development efficiency by 30% by creating a reusable TailwindCSS setup and standardizing project structure, reducing setup time by 60%.
- Boosted website performance by 15% on desktop and 20% on mobile through WebP optimization and PageSpeed Insights improvements, achieving faster load times and better SEO.
- Delivered projects 30% faster by implementing optimized workflows, prioritization, and strong time-management practices.
- Developed and managed WordPress websites, customized themes/plugins, and optimized responsiveness, caching, and SEO.
- Managed Hostinger servers, including DNS, SSL, databases, and performance tuning, while setting up domain-based business emails for clients.
- Built and deployed email API services ensuring reliable, high-performance message delivery for frontend applications.

## EDUCATION

**M. L. Dahanukar College of Commerce** **July 2022 - April 2025**
*Information Science* *GPA: 3.41*
Relevant Coursework: SQL, MongoDB, PHP, Python, Java, HTML, CSS, JavaScript, Flutter, Algorithms, Data Structures, Digital Logic & Applications, Database Normalization & Schema Design, Project Management, UML & System Design (StarUML)

## PROJECTS - VISIT ALL PROJECTS IN PORTFOLIO

**Euka AI: Your Fast Track to PM Interview Success - *Link to project*** **April 2025 - July 2025**

- Full-stack web application built with Next.js, Tailwind CSS and a FastAPI backend integrated with AI via the OpenRouter API.
- Designed an intelligent system that generates 10+ personalized interview modules using company data, job descriptions, and user resumes.
- Integrated PostHog analytics for user behavior tracking and implemented sitemap.xml and blog features, contributing to ~10–15% growth in organic traffic.
- Built a complete user authentication system with Excel-based analytics and reporting, providing instant visibility of 100+ active users, waiting lists, and usage trends, reducing time spent on database checks by 25%.

## SKILLS

**Frontend:** React.js, Next.js, HTML, CSS, JavaScript
**Backend:** Node.js, Express.js, Python, FastAPI, PHP
**Databases:** MongoDB, MySQL, PostgreSQL
**DevOps & Tools:** Git, GitHub, CI/CD, Docker, Postman
**AI Tools:** Claude, ChatGPT, Gemini
**Soft Skills:** Cross-functional Collaboration, Client Communication, Attention to Detail
