EDUCATION

M. L. Dahanukar College of Commerce
Bachelor's, Computer Science in Information Technology

July 2022 - April 2025
GPA: 8.6

PROFESSIONAL EXPERIENCE

Universal Support for Enterprises and Servies Inspiration Private Limited
Web Developer

Vile Parle, MH, India
July 2024 - Present

- Increased development efficiency by 30% by creating a reusable TailwindCSS-configured project setup, reducing redundant work across multiple websites.
- Improved website performance by 15% on desktop and 20% on mobile by optimizing images with WebP format using CloudConvert, reducing file sizes by 30% for JPEG/PNG and 60% for GIFs.
- Enhanced SEO and loading speed by implementing optimizations based on Google PageSpeed Insights, leading to a 15% faster website performance.
- Streamlined project structure, reducing setup time by 60% by establishing a standardized folder and file organization strategy for multiple projects.
- Delivered projects 30% faster than deadlines by adopting an efficient work process and time management techniques.
- Developed two email API services for frontend applications, enabling seamless message delivery with optimized performance

PROJECTS & OUTSIDE EXPERIENCE

Euka AI: Your Fast Track to PM Interview Success - [Link to project](#)
Web Developer

Remote
2025 - Present

- Full-Stack Development: Built complete web application using React.js/Tailwind CSS frontend and FastAPI backend with AI integration via OpenRouter API
- Product Architecture: Designed and implemented intelligent system generating 10+ personalized interview modules from company data, job descriptions, and user resumes
- Analytics & SEO: Integrated PostHog for user tracking, implemented sitemap.xml for SEO optimization, and developed blog functionality for organic traffic
- User Management: Created comprehensive user authentication system with Excel-based analytics tracking and usage reporting

To-Do List Application - [Link to project](#)

Vile Parle, MH, India

- User Authentication: Users enter their email to start managing their to-dos.
- To-Do Management: Users can add, modify, and delete to-dos seamlessly.
- Date Restriction: Users can select today's or future dates; past dates trigger an "Invalid Date" error.
- Task Status Updates: Users can mark tasks as Pending, In Progress, or Completed.
- Error Handling: Implemented proper validation and error handling for incorrect inputs

Tic Tac Toe Game - [Link to project](#)
Web Developer

Vile Parle, MH, India

- Interactive Game Development: Built fully functional tic-tac-toe game using vanilla HTML, CSS, and JavaScript with responsive design
- Game Logic Implementation: Developed complete game mechanics including win/draw detection, player turn management, and game state control
- Audio Integration: Enhanced user experience by implementing sound effects for game interactions and feedback
- User Interface Design: Created intuitive game board layout with CSS styling for optimal visual appeal and user engagement
